

PURE expands...

Pure Superyacht Refit Management is broadening its services in the Superyacht sector.

Pure is pleased to announce the strengthening of its workforce with an additional "hands on" project manager to complement its current PM services, plus a new office manager to assist in administration and logistics.

Additionally, to offer a more efficient and comprehensive service, Pure will exercise its awarded authority from the Spanish Customs by providing in-house Temporary Importation (TPA) tax exemption benefit to its clients. This will enable us to simplify, coordinate and administer your yacht's refit, allow you easier understanding of the financial progress during the work period giving you, the client, a substantial saving on overall costs.

Pure is also able to offer this facility for yachts not employing Pure's management assistance and wish to oversee their own project but who would like to be more cost efficient.

Please call to discuss and plan your vessel's refit needs or for more information and to see if your yacht qualifies for TPA tax exemption benefit for the next refit or yard period.

Pure is able to offer the most competitive rates available for this service.
